

AJITH KUMAR

Software Engineer

9789481738 | ajithkumar.proff@gmail.com | Coimbatore, India | linkedin.com/in/ajithkumarai

PROFESSIONAL SUMMARY

Software Engineer with hands-on experience coding, testing, and debugging full-stack applications using Java, Spring, Hibernate, and JavaScript frameworks like React.js, backed by a strong foundation in Data Structures, object-oriented design principles, and CI/CD pipelines. Comfortable following Agile software development practices in collaborative team environments. Strong analytical, problem-solving, and verbal communication skills.

SKILLS

Backend: Java, Spring Boot, REST APIs, Microservices, Spring Data JPA / Hibernate

Database: SQL, RDBMS, PostgreSQL, Redis

DevOps & Security: Version Control Systems (Git), Containerization (Docker), JWT

Core: Object-Oriented Programming, Networking, Data Structures & Algorithms, Operating System

WORK EXPERIENCE

Engineering Trainee Intern | Telesoft Technologies

Jun 2025 – Jan 2026

- Coded and maintained 15+ responsive UI components using React.js, HTML5, and CSS, improving page load performance by ~20%.
- Executed test plans for 10+ RESTful API endpoints integrated with frontend components, identifying, logging, and debugging data sync issues, reducing them by ~30%.
- Developed Keycloak-based authentication and authorization, securing login and role-based access for 3+ user roles.

PROJECTS

KnowTheRound | [Github](#) | [Live Demo](#) | Java, Spring Boot, PostgreSQL, Redis, JWT, React, Docker

- Designed and coded a full-stack Spring Boot application for sharing, searching, bookmarking, and liking interview experiences across 20+ companies, backed by PostgreSQL.
- Developed and tested authentication and authorization with JWT - email verification, password reset, role-based access control, and Redis-based token blacklisting.
- Integrated Redis caching and Spring Data JPA Specifications for pagination, filtering, and search, reducing average API response time by ~35%.

NextContest | [Github](#) | Java, Spring Boot, PostgreSQL, React, JWT, OAuth2, Docker

- Architected a full-stack contest aggregator unifying Codeforces, LeetCode, and CodeChef into one dashboard with calendar, reminders, and bookmarks, using Spring Boot, PostgreSQL, and Spring Data JPA.
- Engineered secure auth system with JWT access/refresh rotation, BCrypt hashing, email verification, and Google OAuth2, plus role-based access control (RBAC) for USER/ADMIN roles.
- Implemented 40+ REST APIs and a fault-tolerant, platform-isolated sync architecture with scheduled jobs for contest sync, live updates, and automated email reminders.

EDUCATION

B. E. Computer Science and Engineering (AI & ML) | CGPA: 8.2

Graduated: 2026

Sri Eshwar College of Engineering | Coimbatore, Tamil Nadu
